**Value Added Course Applied History Report**  
**2018-19**

The history department carries out various activities every year. It will have to include the Value Added Course. The main objective of this course is to impart the knowledge of the subject along with the regular subject knowledge to the students of the department. This year we started this course from dated 20/08/2018. Its detailed report is as follows.

This course is open to any student of Arts. In this course we include mainly second year students in the department. For this, the College Development Committee and the IQAC department have fixed the admission capacity of forty students. We have prepared this course for a total of 36 hours from 20th of August to 29th of September. A total of forty students had participated in this course this year. In it we mainly teach What is applied History?, Applied history and Research on Social Science, Applied history and Present era, Cultural, Historical and Natural Monument management, Career opportunity etc.

We took a 20 mark examination of all these students on 29th September 2018 and based on that we tested the basic knowledge of the students and through this course we proved to the students how important history is as the main subject. All the thirty students completed this course with good marks. Through this course, we teach students the importance of applied history and its overall contribution to history, what is currently happening in history writing, and other scientific research methods? This is the main purpose of this course.

In this way we successfully implemented this course in the year 2018-19. For this, the course coordinator of the history department, Dr. S. M. Wandhare worked hard. In order to make the course successful, Prof. Pankaj Jeswal, Prof. Babu Damre helps. From time to time, Prof. Ravi Satbhai provided guidance and interaction with the new students.

In this way we try to impart knowledge in addition to the regular curriculum so that the students develop a love of history. Through this course, students have a new enthusiasm and a different satisfaction of learning something new. This course is very important from a business point of view while studying history at present. In this way the course was completed.

For your information, we are presenting the report of value added Course applied history. Thank you.

Yours Faithfully,

**Value Added Course in Human Rights Report**  
**2018-19**

The Political Science department carries out various activities every year. It will have to include the Value Added Course. The main objective of this course is to impart the knowledge of the subject along with the regular subject knowledge to the students of the department. This year we started this course from dated 01/09/2018. Its detailed report is as follows.

This course is open to any student of Arts. In this course we include mainly Third year students in the department. For this, the College Development Committee and the IQAC department have fixed the admission capacity of thirty students. We have prepared this course for a total of 30 hours from 01st of September to 04th of November. A total of thirty students had participated in this course this year. In it we mainly teach What is Human Rights?, Human Rights and Research on Social Science, Human Rights and Present era, Career opportunity etc.

We took a 20 mark examination of all these students on 04th of November 2018 and based on that we tested the basic knowledge of the students and through this course we proved to the students how important Political Science is as the main subject. All the thirty students completed this course with good marks. Through this course, we teach students the importance of Human Rights and its overall contribution to Political Science, what is currently happening in Political Science writing, and other scientific research methods? This is the main purpose of this course.

In this way we successfully implemented this course in the year 2018-19. For this, the course coordinator of the Political Science department, Prof. R.E. Bharudkar worked hard. In order to make the course successful, Dr. P.A. Hambarde helps & time to time provided guidance and interaction with the new students.

In this way we try to impart knowledge in addition to the regular curriculum so that the students develop a love of Political Science. Through this course, students have a new enthusiasm and a different satisfaction of learning something new. This course is very important from a business point of view while studying Political Science at present. In this way the course was completed.

For your information, we are presenting the report of value added Course in Human Rights. Thank you.

Yours Faithfully,

## Course Proposal

Name of the course	-	Value Added course in Climate Change.
Course coordinator-		S.G.Narote.
Duration	-	3Hours per week
Target Group	-	U. G. students
Total Tenure	-	10Weeks (30 clock hours.)

- Objectives of the course :-

1. To describe how the earth climate system works.
2. To summarize general atmosphere circulation patterns , ocean circulation patterns and climate oscillations such as the El-Nino Southern Oscillation.
3. To illustrate components of the earth carbon cycle and quantitatively how addition of CO<sub>2</sub> to the atmosphere through burning fossilfuels will influence the climate.
4. To teach students the scientific basis to analyze and critique policy issues related to global warming.

● **Course Content:-**

1. **Concept of Human Geography:-** Meaning, Definition, Nature and Scope of Human Geography.
2. **Man and Enevironment.**
3. **Physical and social profile of racial groups.**
4. **Human settlement.**

Sub: Proposal for Value added course in "Hands in Chromatography Technique"

Respected Sir,

With reference to above subject, the departments of chemistry wish to organize a value added course "Hands in Chromatography Technique" from academic year 2018-19. The Course duration is of 30 clock hours spread over 15 weeks (2 periods per week) Course is specially designed for the UG students will participate in the course. A detailed proposal is enclosed herewith this letter we request you to kindly sanction the permission and financial support to conduct course.

Thanking you.

## Course Proposal

Name of Course	Value Added Course in Hands in Chromatography Technique.
Course coordinator	Shri. Ralebhat J.M. Shri.Kolhe S.B.
Duration	15 week (Total 30 clock hours, 2 hours per week)
Eligibility	Students do this course simultaneously with graduation.
Fees	No Fee (Free)
Course Duration	2 hours per week
Target Group	B.Sc. Chemistry Student
Total tenure	15 week

### Objectives of the Course:

The Value Added Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of chemistry students. The main objectives of the program are:

1. To provide students an understanding of the expectations of industry.
2. To improve employability skills of chemistry students.
3. To bridge the skill gaps and make students industry ready.
4. To provide an opportunity to students to develop inter-disciplinary skills.
5. All the final year students are participated in this value added course. This course is intended to provide advanced Chemistry aspects of Programmable. Also, features and applications of chemistry which has the ability to monitor entire system in real time also were discussed. Students participated in this value added course realized the emerging trends in industries. Topics covered in this value added course are useful in their academic curriculum also.

## Value Added Course Content (Syllabus) 2018-19

### Principles of Chromatography

Chromatography is a separation method where the analyte is combined within a liquid or gaseous mobile phase., which is pumped through a stationary phase. Usually one phase is hydrophilic and the other lipophilic. The components of the analyte interact differently with these y=two phases. Depending on of their polarity they spend more or less time interacting with the stationary phase and are thus retarded to a greater or lesser extent. This leads to the separation of the different components present in the sample. Each sample component elutes from the stationary phase at a specific time, its retention time. As the components pass through the detector their signal is recorded and plotted in the form of a chromatogram.

### Types of Chromatography

The four main types of chromatography are

#### 1. Adsorption Chromatography

In the process of adsorption chromatography, different compounds are adsorbed on the adsorbent to different degrees based on the absorptivity of the component. Here also, a mobile phase is made to move over a stationary phase, thus carrying the components with higher absorptivity to a lower distance than that with lower absorptivity. The main types of chromatographic techniques that are used in industries are given as under.

#### 2. Thin Layer Chromatography

In the process of thin-layer chromatography (TLC), the mixture of substances is separated into its components with the help of a glass plate coated with a very thin layer of adsorbent, such as silica gel and alumina, as shown in the figure below.

The plate used for this process is known as chrome plate. The solution of the mixture to be separated is applied as a small spot at a distance of 2 cm above one end of the plate. The plate is then placed in a closed jar containing a fluid termed as an eluant, which then rises up the plate carrying different components of the mixture to different heights.

#### 3. Column Chromatography

Column chromatography is the technique used to separate the components of a mixture using a column of suitable adsorbent packed in a glass tube, as shown in the figure below. The mixture is placed on the top of the column, and an appropriate eluant is made to flow down the column slowly.

Depending upon the degree of adsorption of the components on the wall adsorbent column, the separation of the components takes place. The component with the highest absorptivity is retained at the top, while the other flow down to different heights accordingly.

#### 4. Partition chromatography

In this process, a continuous differential partitioning of components of a mixture into a stationary phase and mobile phase takes place. The example of partition chromatography can be seen in paper chromatography. In this process, chromatography paper is used as a stationary phase which is suspended in a mixture of solvents that act as a mobile phase.

Here, we put a spot at the base of the chromatographic paper with the mixture to be separated and as the solvent rises up this paper, the components are carried to different degrees depending upon their retention on the paper. The components are thus separated at different heights.

Progress Report for Value Added Course

Academic year 2018-19

“Hands in Chromatography technique”

A value added course “Hands in Chromatography technique” started in the department of chemistry from academic year 2018-19. Every year 15 deserving students are admitted to course. Students participating in course are benefitted in their recruitment in chemical industry and laboratory. This course also helps them increase their awareness about pharmaceutical and chemical industrial knowledge.

In academic year 2018-19, 15 students sought admission in the course from July to October. The continued as two lectures were scheduled per week. After completion of the course certificate were issued and feedback from student was collected.

**Sub: Proposal for Value added course in "Conservation of energy".**

Respected Sir,

With reference to above subject, the departments of Physics wish to organize a value added course "Conservation of energy" from academic year 2018-19. The Course duration is of 30 clock hours spread over 10 weeks (2 periods per week) Course is specially designed for the PG students will participate in the course. A detailed proposal is enclosed herewith this letter we request you to kindly sanction the permission and financial support to conduct course.

Thanking you.

Yours Faithfully

## Course Proposal

Name of Course	Value Added Course in Conservation of energy
Course coordinator	Prof. Kokane C.D. Prof. Karande R.H
Duration	15 week (Total 30 clock hours, 2 hours per week)
Eligibility	Students do this course simultaneously with graduation.
Fees	No Fee (Free)
Course Duration	2 hours per week
Target Group	B.Sc. physics Student
Total tenure	15 week

### **Objectives of the Course:**

The Value Added Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of physics students. The main objectives of the program are:

1. To provide students an understanding of the expectations of industry.
2. To improve employability skills of physics students.
3. To bridge the skill gaps and make students industry ready.
4. To provide an opportunity to students to develop inter-disciplinary skills.
5. All the final year students are participated in this value added course. This course is intended to provide advanced physics aspects of Programmable. Also, features and applications of chemistry which has the ability to monitor entire system in real time also were discussed. Students participated in this value added course realized the emerging trends in industries. Topics covered in this value added course are useful in their academic curriculum also.

2. Wind turbine needs tethering control when .....

(A) Mono blade is used (B) twin blade is used (C) both A and B (D) none of these

3. Wind turbine blade length are in the range of .....

(A) 0.5 m to 25 m (B) 50 m to 25 m (C) 11 m to 2.5 m (D) 15 m to 25 m

4. Twin blade horizontal axis wind turbine generator unit is of .....

(A) 3MW, 2MW and 1 MW (B) 2MW, 2MW and 3 MW (C) 1MW, 2MW and 3 MW (D) none of these

5. Wind turbine height are in the ranges of .....

(A) 0.7 m to 70m (B) 10 m to 50m (C) 20 m to 70m (D) 30 m to 60m

6. Which of the following is a non-renewable source of energy?

(A) Wood (B) Sun (C) Fossil fuels (D) Wind

7. Fuel used in thermal power plants is

(A) water (B) uranium (C) biomass (D) fossil fuels

8. Which is the ultimate source of energy?

(A) Water (B) Sun (C) Uranium (D) Fossil fuels

9. Which part of the solar cooker is responsible for greenhouse effect?

(A) Coating with black color inside the box (B) Mirror (C) Glass sheet (D) Outer cover of the solar cooker

10. Which of the following is a non-renewable resource?

(A) Coal (B) Forests (C) Water (D) Wildlife

11- The range of wind speed suitable for wind power generator is .....

(A) 0 to 5 m/s (B) 5 to 25 m/s (C) 25 to 50 m/s (D) 50 to 75 m/s

12. - the fixed dome type biogas plant has been adopted on a large scale in.....

Value added course Name: - Conservation of Energy

**PROGRESS REPORT**

Academic Year -2018-19

A value added course on the conservation of energy started in the department of physics from academic year 2018-2019. There are 20 deserving students are admitted in the course. Students participated in course are benefited in the recruitment in government and private jobs. This course are also helping them to increase awareness in daily economical life.

In academic year 2018-2019 student get admitted in course. The course was started from July to October. The continued as two were scheduled per week. After completion of course certificate were issued and feedback from students was collected

## Course Proposal

Name of Course	Value Added Course in Bioinstrumentation
Course coordinator	Shri. Khose A.B., Shri.Madake C.D.
Duration	15 week (Total 30 clock hours, 2 hours per week)
Eligibility	Students do this course simultaneously with graduation.
Fees	No Fee (Free)
Course Duration	2 hours per week
Target Group	B.Sc. Zoology Student
Total tenure	15week

### Objectives of the Course:

The Value Added Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of Zoology students. The main objectives of the program are:

1. To provide them with additional knowledge along with their curriculum.
2. To create knowledge among about instrument used in biological practices.
3. To increase the research ability of student.
4. To provide an opportunity to students to develop inter-disciplinary skills.
5. To promote the student toward laboratory practices.
6. To provide platform toward industrial job opportunity.
7. To increase interests towards life science.
