Name of Course	Add on Course in Hands in Chromatography Technique.
Course coordinator	Shri. Ralebhat J.M. Shri.Kolhe S.B.
Duration	15 week (Total 30 clock hours, 2 hours per week)
Eligibility	Students do this course simultaneously with graduation.
Fees	No Fee (Free)
Course Duration	2 hours per week
Target Group	B.Sc. Chemistry Student
Total tenure	15 week

Objectives of the Course:

The Add on Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of chemistry students. The main objectives of the program are:

1. To provide students an understanding of the expectations of industry.
2. To improve employability skills of chemistry students.
3. To bridge the skill gaps and make students industry ready.
4. To provide an opportunity to students to develop inter-disciplinary skills.
5. All the final year students are participated in this Add on course. This course is intended to provide advanced Chemistry aspects of Programmable. Also, features and applications of chemistry which has the ability to monitor entire system in real time also were discussed. Students participated in this Add on course realized the emerging trends in industries. Topics covered in this Add on course are useful in their academic curriculum also.

Principles of Chromatography

Chromatography is a separation method where the analyte is combined within a liquid or gaseous mobile phase. This is pumped through a stationary phase. Usually one phase is hydrophilic and the other lipophilic. The components of the analyte interact differently with these two phases. Depending on their polarity they spend more or less time interacting with the stationary phase and are thus retarded to a greater or lesser extent. This leads to the separation of the different components present in the sample. Each sample component elutes from the stationary phase at a specific time, its retention time. As the components pass through the detector their signal is recorded and plotted in the form of a chromatogram.

Types of Chromatography

The four main types of chromatography are

1. Adsorption Chromatography

In the process of adsorption chromatography, different compounds are adsorbed on the adsorbent to different degrees based on the absorptivity of the component. Here also, a mobile phase is made to move over a stationary phase, thus carrying the components with higher absorptivity to a lower distance than that with lower absorptivity. The main types of chromatographic techniques that are used in industries are given as under.

2. Thin Layer Chromatography

In the process of thin-layer chromatography (TLC), the mixture of substances is separated into its components with the help of a glass plate coated with a very thin layer of adsorbent, such as silica gel and alumina, as shown in the figure below.

The plate used for this process is known as chrome plate. The solution of the mixture to be separated is applied as a small spot at a distance of 2 cm above one end of the plate. The plate is then placed in a closed jar containing a fluid termed as an eluent, which then rises up the plate carrying different components of the mixture to different heights.

3. Column Chromatography

Column chromatography is the technique used to separate the components of a mixture using a column of suitable adsorbent packed in a glass tube, as shown in the figure below. The mixture is placed on the top of the column, and an appropriate eluent is made to flow down the column slowly.

Depending upon the degree of adsorption of the components on the wall adsorbent column, the separation of the components takes place. The component with the highest absorptivity is retained at the top, while the other flow down to different heights accordingly.

4. Partition chromatography

In this process, a continuous differential partitioning of components of a mixture into a stationary phase and mobile phase takes place. The example of partition chromatography can be seen in paper chromatography. In this process, chromatography paper is used as a stationary phase which is suspended in a mixture of solvents that act as a mobile phase.

Here, we put a spot at the base of the chromatographic paper with the mixture to be separated and as the solvent rises up this paper, the components are carried to different degrees depending upon their retention on the paper. The components are thus separated at different heights.

Progress Report for Add on Course

Academic year 2019-20

“Hands in Chromatography technique”

An Add on course “Hands in Chromatography technique” started in the department of chemistry from academic year 2019-20. Every year 15 deserving students are admitted to course. Students participating in course are benefitted in their recruitment in chemical industry and laboratory. This course also helps them increase their awareness about pharmaceutical and chemical industrial knowledge.

In academic year 2019-20, 16 students sought admission in the course from July to October. The continued as two lectures were scheduled per week. After completion of the course certificate were issued and feedback from student was collected.

Sub: Proposal for Add on course in "Conservation of energy".

Respected Sir,

With reference to above subject, the departments of Physics wish to organize a Add on course "**Conservation of energy**" for academic year 2019-20. The Course duration is of 30 clock hours spread over 15 weeks (2 period per week) Course is specially designed for the UG students will participate in the course. A detailed proposal is enclosed herewith this letter we request you to kindly sanction the permission and financial support to conduct course.

Thanking you.

Name of Course	Add on Course in Conservation of energy
Course coordinator	Prof. KarandeR.H
Duration	15 week (Total 30 clock hours, 2 hours per week)
Eligibility	Students do this course simultaneously with graduation.
Fees	No Fee (Free)
Course Duration	2 hours per week
Target Group	B.Sc. Physics Student
Total tenure	15 week

Objectives of the Course:

The Value Added Courses aim to provide additional learner centric graded skill oriented technical training, with the primary objective of improving the employability skills of Physics students. The main objectives of the program are:

1. To provide students an understanding of the expectations of industry.
2. To improve employability skills of Physics students.
3. To bridge the skill gaps and make students industry ready.
4. To provide an opportunity to students to develop inter-disciplinary skills.
5. All the final year students are participated in this value added course. This course is intended to provide advanced Physics aspects of Programmable. Also, features and applications of chemistry which has the ability to monitor entire system in real time also were discussed. Students participated in this value added course realized the emerging trends in industries. Topics covered in this value added course are useful in their academic curriculum also.

Conservation of Energy

(Add on Course - Syllabus)

Objectives:

After reading this course, you will be able to-

- 1) Explain the meaning of the term 'energy'
- 2) Classify the various sources of energy as renewable and non-renewable
- 3) Discuss the importance of energy conservation
- 4) Suggest methods of conserving energy
- 5) Identify energy options for the future.

CONSERVATION OF ENERGY

1. What is Energy? Definition and units of energy,
2. Sources of Energy
3. Classification of Sources of Energy :- (Renewable Sources, Non-renewable Sources)
4. Energy Conservation: Why?
 1. Demand exceeds supply
 2. Energy saved is energy generated
 3. Fuels are limited
5. Sources of energy
 - 1) conventional source of energy
 - a) Commercial –coal, petroleum, electricity, oil and natural gas
 - b) Noncommercial – fire wood, straw, dried dung
 - 2) Non-conventional energy sources
 - a) Bio energy
 - b) Solar energy
 - c) Wind energy
 - d) Tidal energy
 - e) Energy from- urban waste
- 6 Conservation Of Energy: How?
 1. At home (a) Power (b) Fuel
 2. in the farm or work place (a) In the farm (b) At the work place
 3. on the road
7. Energy Options for the Future
 1. Biogas
 2. Solar Energy(a) Solar cooker -b) Solar lighting(c) Solar heating –
 3. Hydel Energy
 4. Wind Energy

Add on course Name: - Conservation of Energy

PROGRESS REPORT

Academic Year -2019-20

An Add on course on the conservation of energy started in the department of physics from academic year 2019-2020. There are 20 deserving students are admitted in the course. Students participated in course are benefited in the recruitment in government and private jobs. This course are also helping them to increase awareness in daily economical life.

In academic year 2019-2020 student get admitted in course. The course was started from July to October. The continued as two were scheduled per week. After completion of course certificate were issued and feedback from students was collected

Add-on Course Applied History Report
2019-20

The history department carries out various activities every year. It will have to include the Add-on Course. The main objective of this course is to impart the knowledge of the subject along with the regular subject knowledge to the students of the department. This year we started this course from dated 19/08/2019. Its detailed report is as follows.

This course is open to any student of Arts. In this course we include mainly second year students in the department. For this, the College Development Committee and the IQAC department have fixed the admission capacity of forty students. We have prepared this course for a total of 36 hours from 19th of August to 28th of September. A total of forty students had participated in this course this year. In it we mainly teach What is applied History?, Applied history and Research on Social Science, Applied history and Present era, Cultural, Historical and Natural Monument management, Career opportunity etc.

We took a 20 mark examination of all these students on 28th of September 2019 and based on that we tested the basic knowledge of the students and through this course we proved to the students how important history is as the main subject. All the thirty students completed this course with good marks. Through this course, we teach students the importance of applied history and its overall contribution to history, what is currently happening in history writing, and other scientific research methods? This is the main purpose of this course.

In this way we successfully implemented this course in the year 2019-20. For this, the course coordinator of the history department, Dr. S. M. Wandhare worked hard. In order to make the course successful, Prof. Pankaj Jeswal, Prof. Bapu Damre helps. From time to time, Prof. Ravi Satbhai provided guidance and interaction with the new students.

In this way we try to impart knowledge in addition to the regular curriculum so that the students develop a love of history. Through this course, students have a new enthusiasm and a different satisfaction of learning something new. This course is very important from a business point of view while studying history at present. In this way the course was completed.

For your information, we are presenting the report of Add-on Course applied history. Thank you.

Yours Faithfully,

Dr. S. M. Wandhare

Add On Course in Human Rights Report
2019-20

The Political Science department carries out various activities every year. It will have to include the Add on Course. The main objective of this course is to impart the knowledge of the subject along with the regular subject knowledge to the students of the department. This year we started this course from dated 01/09/2019. Its detailed report is as follows.

This course is open to any student of Arts. In this course we include mainly Third year students in the department. For this, the College Development Committee and the IQAC department have fixed the admission capacity of thirty students. We have prepared this course for a total of 30 hours from 01st of September to 04th of November. A total of thirty students had participated in this course this year. In it we mainly teach What is Human Rights?, Human Rights and Research on Social Science, Human Rights and Present era, Career opportunity etc.

We took a 20mark examination of all these students on 04th of November 2018 and based on that we tested the basic knowledge of the students and through this course we proved to the students how important Political Science is as the main subject. All the thirty students completed this course with good marks. Through this course, we teach students the importance of Human Rights and its overall contribution to Political Science, what is currently happening in Political Science writing, and other scientific research methods? This is the main purpose of this course.

In this way we successfully implemented this course in the year 2019-20. For this, the course coordinator of the Political Science department, Prof. R.E. Bharudkar worked hard. In order to make the course successful, Dr. P.A. Hambarde helps & time to time provided guidance and interaction with the new students.

In this way we try to impart knowledge in addition to the regular curriculum so that the students develop a love of Political Science. Through this course, students have a new enthusiasm and a different satisfaction of learning something new. This course is very important from a business point of view while studying Political Science at present. In this way the course was completed.

For your information, we are presenting the report of Add on Course in Human Rights. Thank you.

Yours Faithfully,

Prof. R.E. Bharudkar
