COP Course/Remedial Coaching Classes
Subject: Public Administration
Progress Report: 2023-2024

Identified slow learners were given separate remedial coaching. After the same, their progress was checked by a test. Maximum students showed improvement. These who could not show remarkable progress were counselled individually. Remedial teaching to slow learners brought them in the main stream.

Remedial teaching thus proved fruitful. Identification of slow learners is the main concern. Some students entering to the UG course didn't have sufficient basic knowledge of the subject. This course was fruitful to them throughout.

Identified slow learners were given separate remedial coaching. After the same, their progress was checked by a test. Maximum students showed improvement. These who could not show remarkable progress were counselled individually. Remedial teaching to slow learners brought them in the main stream.

Remedial teaching thus proved fruitful. Identification of slow learners is the main concern. Some students entering to the UG course didn't have sufficient basic knowledge of the subject. This course was fruitful to them throughout.

PROGRESS REPORT

Subject: Physics

Academic Year- 2023-24

Identified slow learners were given separate remedial coaching. After the same, their progress was checked by a test. Maximum students showed improvement. These who could not show remarkable progress were counselled individually. Remedial teaching to slow learners brought them in the main stream.

Remedial teaching thus proved fruitful. Identification of slow learners is the main concern. Some students entering to the UG course didn't have sufficient basic knowledge of the subject. This course was fruitful to them throughout.

Slow learners Report
2023-2024

Every year at the beginning of the new academic year, we organize Slow learners on behalf of our department. This year also we started this course from dated / /2023. Its detailed report is as follows.

We have started this course in the department for those who have entered the first year of the B.Sc. and have not had Botany as a subject before. For this, we selected students in class XII who did not belong to the Faculty of Science and whose Botany was not the subject. We have prepared this course for a total of 16 hours from 10th of October to 15th of December. A total of 06 students had participated in this course this year. In it we mainly teach the basics of Botany. That every Botany student should know. Accordingly, we explained to the students what is meant by Botany, its nature, scope, importance, and need for Botany. Study of Botany and other science also industrial opportunities in Botany etc. We took 20 mark examinations of all these students on 16th December 2023 and based on that we tested the basic knowledge of the students and through this course we proved to the students how important Botany is as the main subject. All the 06 students completed this course with good marks. Through this course, we paved the way for those who were not previously subject to Botany and brought them into the mainstream by guiding them through this bridging course on how to gain momentum in the study of Botany. This is the main purpose of this course.

In this way we successfully implemented this course in the year 2023/24. For this, the course coordinator of the Botany department, Prof. S.A.Sangle worked hard. In order to make the course successful, Prof. S.B.Bhandwalkar helps and time to time provided guidance and interaction with the new students.

Through this course, the mental strength of other faculty students was raised and the joy and excitement of participating in the Botany family was created in them. He got basic knowledge of Botany through this course. In this way the course was completed.

For your information, we are presenting the report of Slow learners. Thank you.

Yours Faithfully,

Prof. Sangle S.A.

Remedial Course

Slow learners

Subject: Botany

Progress Report

Identified slow learners were given separate remedial coaching. After the same, their progress was checked by a test. Maximum students showed improvement. These who could not show remarkable progress were counselled individually. Remedial teaching to slow learners brought them in the main stream.

Remedial teaching thus proved fruitful. Identification of slow learners is the main concern. Some students entering to the UG course didn't have sufficient basic knowledge of the subject. This course was fruitful to them throughout.
